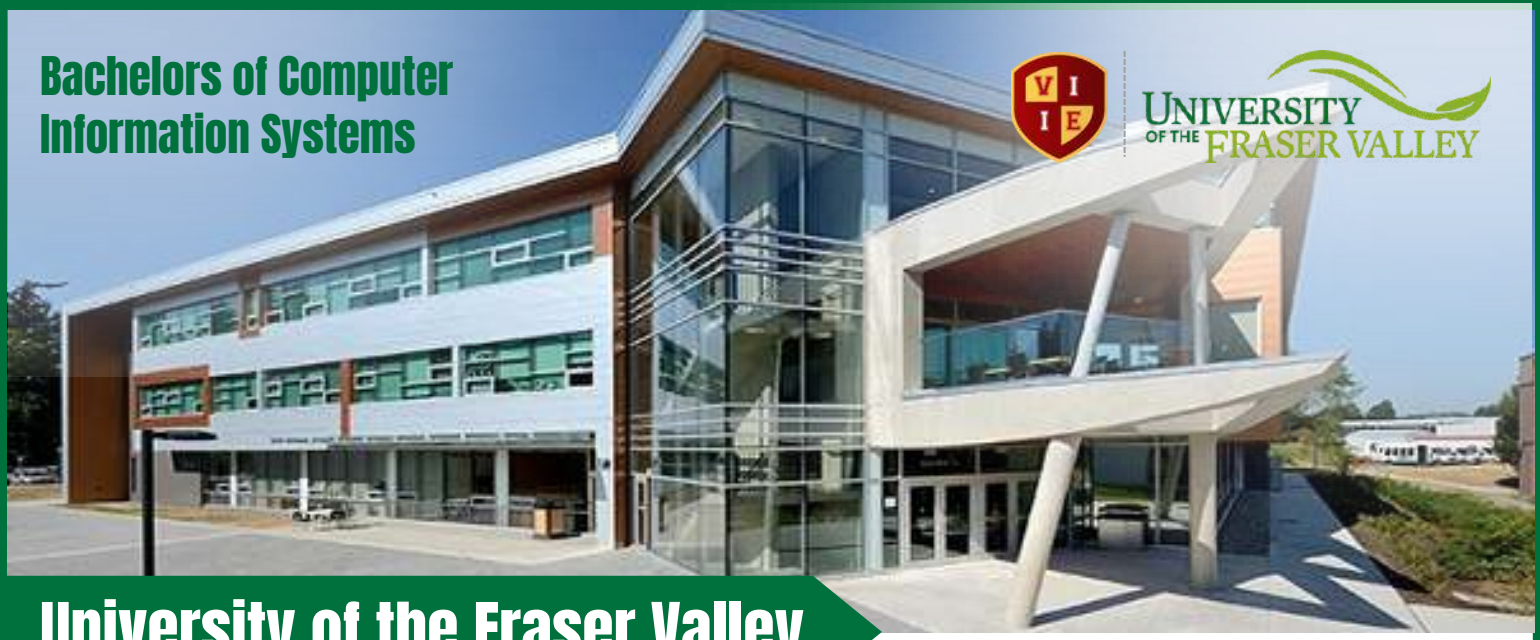
Bachelors of Computer Information Systems



University of the Fraser Valley

Studying at **UFV** provides a great opportunity to explore Canada's world-famous wilderness and the vibrant, multicultural city of Vancouver. This campus features classroom and office spaces, a large library, a cafeteria, a non-smoking, four-floor residence with 102 double occupancy suites, a bookstore, a sports centre, and a new 50,000 square foot student centre that integrates student activities and campus life with key academic and administrative offices.

A UFV Bachelor of Computer Information Systems (BCIS) can help you gain the analytical, problem-solving, and technical skills required to become a manager in the IT industry. On the way to completing your bachelor's degree, you can earn a certificate and diploma in Computer Information Systems, enhancing your employment opportunities even before you graduate.

In your first two years, you get introduced to topics such as network and database administration, web design, information systems management, network security, and programming. You also gain the business and communications skills that are essential for success in the workplace.
